## WORK EXPERIENCE

### Artificial Intelligence Research, Feedzai, Internship

Fev 2026 - Present

- Developing deep learning models for device identification to detect financial fraud, using Apache Spark for large-scale data processing to match incoming devices against historical databases, while managing the full model lifecycle using standard MLOps practices.

### AI Engineer, Nutrium, Internship

Jul 2025 - Feb 2026

- Led Generative AI development and monitoring for clinical nutrition workflows, including an Agentic LLM using tool-calling for precise meal planning, a multimodal photo food mapping pipeline, and classification tasks strategically balancing LLMs and SLMs.

### Artificial Intelligence Engineer, ITSCredit, Part-Time Job

Fev 2025 - Jul 2025

- Developed a machine learning service into a SaaS platform using RPC to build predictive models for loan approvals and simulate credit scores, developed with Python and .NET.

### Designer and FullStack Developer, Young Minho Enterprise (YME)

Dec 2023 - Present

- As a member of YME's RSC (Corporate Social Responsibility) team, i was responsible for the development of a Volunteer program web app, designed to match individuals with volunteering opportunities that fit their schedules and locations in order to make sure there is "At least one volunteering opportunity for everyone".

### Junior Consultant, Young Minho Enterprise (YME)

Nov 2023 - Nov 2024

- Junior Consultant at YME, actively developing towards Digital Development team. Mainly responsible for prototyping and developing websites, social media posts, flyers, etc., for client companies.

### Program Committee, IEEE Student Branch

Nov 2023 - Nov 2024

- Active member of the IEEE Student Branch, serving on the Program Committee dedicated to organizing multi-area workshops for all engineering students, along with volunteering programs that reach all academic community.

### Sponsorship, Engineering Olympics

Nov 2023 - Feb 2024

- Contributed to Engineering Olympics organization as part of the sponsors team, spearheading fundraising efforts.

### Backend Developer, CESIUM

Jul 2022 - Aug 2022

- Developed the API behind CESIUM (computer science students association) website.

---

## EDUCATION

### Master in Artificial Intelligence

Sept 24 - Present

Faculdade de Engenharia da Universidade do Porto - **current average: 17**

### Bachelor in Software Engineering

Sept 2021 - Jul 2024

Universiadade do Minho - final **average: 14.0 / 20.0**

### C1 Cambridge Certificate - English (CEFR)

Sept 2021 - Nov 2021

EzLanguage School - scored 186 / 190 (**C1 Level**)
